

QUALITY MATTERS

COMPLETE TURNKEY QUALITY SOLUTIONS

The SAXE Group product range covers all major technologies in the plastic industry. It is our goal to provide you with complete turnkey solutions, starting from raw material handling to finished and packed goods. Leveraging the extensive skills and deep product knowledge within SAXE Group, we are able to both understand and assist with any aspect of your project.

We strive to be by your side in every phase of the project. SAXE Group will be there for you from idea conception, to project management, to final approval at your production site, and long term service and maintenance. Our primary areas of focus are:

- Automation
- Injection moulding
- Extrusion
- Blow molding
- PUR production
- Auxiliary equipment
- Service and calibration
- Validation and optimization

INJECTION MOULDING

We deliver high quality injection moulding machinery to fulfill the most demanding jobs in the production phase. Our relentless focus on continuous improvement, development and machine optimization, coupled with industry leading suppliers allows us to provide solutions unmatched in the industry. In close dialog with you, we select the most suitable machinery for your production facility. We offer machinery in different price levels according to your needs. Thereby, you always get the most value for your investment.

EXTRUSION

SAXE is able to supply and support equipment for nearly every segment of extrusion. From micro extrusion, sheet lines, blown film lines, pipe and profile lines, special lines for medical applications to recycling lines. The most important goal for SAXE is supplying our customers with complete, high quality lines. It is only through our extensive network of extrusion equipment suppliers that this is possible.

AUTOMATION

We design and develop automation for all industries – with hundreds of automation and robotic solutions delivered worldwide. SAXE has delivered array of systems to the plastic, pharmaceutical, food industries including clean room productions. For the food packaging industry SAXE offers linear high-speed takeout robots for part handling and automation with IML (In-Mould Labelling). We can incorporate complete packaging cells for packing products in boxes, on pallets or in cages. We possess many years of experience in developing these customized solutions for your production facilities.

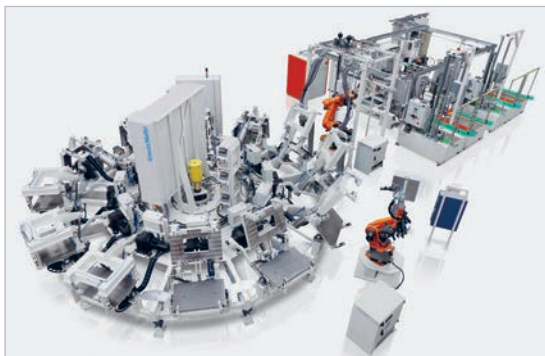

CONSULTING, PROJECT MANAGEMENT AND SERVICE

SAXE Group is not just a machine supplier – the delivery of machinery is only the beginning! Our skilled and experienced team will ensure that we can offer professional consulting and project planning throughout the duration of the project. Based on your requests, we customize solutions to you, and we are with you from the conception of your idea to the end of the production. Our commitment to your projects ensures quality, technologically advanced solutions – on time.

Project management, proof of concept, validation, documentation, installation, calibration and preventive maintenance are all important aspects of a project. We make sure that all of these challenges are taken care of during and after the supply of equipment.

You will never feel alone after the delivery of a machine, as our service team is always ready to help you. Our goal is to assist you in making a plan for preventive maintenance immediately after delivery, and supporting you long term.

POLYURETHANE

SAXE designs and manufactures highly specialized machines for the production of polyurethane foam. We deliver complete turnkey installations of the highest quality to manufacture parts for furniture, cars, home appliances and technical products. Combining this technology with composites makes the possibilities endless.

AUXILIARY EQUIPMENT

We deliver a wide variety of auxiliary equipment from a vast range of suppliers around the world. SAXE delivers and services everything from single, stand-alone units to complete systems. We are able to supply all equipment needed around or in your production machine – whether it is for injection moulding, extrusion, automation, polyurethane or other production technologies.

SERVICE AND MAINTENANCE

The SAXE service team consist of technicians with high technical skills and in-depth product knowledge. Our service team can help to ensure proper installation process and that you receive the required assistance within the shortest possible response time. Whether you need service or preventive maintenance, our service team is always ready to help.

OPTIMISATION

MORE THAN 50 YEARS OF EXPERIENCE

In 1967, Henning Saxe Hansen founded SAXE Group with a focus on injection moulding and extrusion. Through the years, the product range expanded with a large number of products for the manufacturing of plastic parts. The company started as a merchant business, in line with customer and development demands, SAXE grew into a merchant, consulting and engineering company.

Today SAXE Group is still family owned and managed by an innovative and dynamic team. SAXE employs a number of high-qualified employees with various backgrounds. The diverse experience and qualifications of our team ensure our customers a practical and theoretical approach to the tasks.

OUR MISSIONS

- Knowledge creates value
- Sharing competence
- Service creates value
- Strong supply chain
