

MEDTEC 2015, Stuttgart April 21-23

Cleanroom Production Demonstration

Gimac, Syneo, BW-Tec and SAXE Group have joined forces to present a new concept in MD manufacturing. Customers are often facing challenges when integrating technologies from different suppliers, having to manage, validate and service the process.

Teaming up, but keeping the different suppliers as innovative autonomous units, makes the task less time consuming for the customer in regards to project management, and ensures that the task is completed with the newest and most innovative solution.

With focus strongly on automation and minimal workload, the team delivers not only the best machinery for the process, but also the best solution. Medtec Europe will feature a live demonstration area with clean room production simulation of tubes, with different post treatments, such as cut to length, drilling and laser welding.

Expert technicians will be on hand to answer any questions you might have.
